Artificial Intelligence with Python By Prateek Joshi

Build real-world Artificial Intelligence applications with Python to intelligently interact with the world around you

About This Book

- Step into the amazing world of intelligent apps using this comprehensive guide
- Enter the world of Artificial Intelligence, explore it, and create your own applications
- Work through simple yet insightful examples that will get you up and running with Artificial Intelligence in no time

Who This Book Is For

This book is for Python developers who want to build real-world Artificial Intelligence applications. This book is friendly to Python beginners, but being familiar with Python would be useful to play around with the code. It will also be useful for experienced Python programmers who are looking to use Artificial Intelligence techniques in their existing technology stacks.

What You Will Learn

- Realize different classification and regression techniques
- Understand the concept of clustering and how to use it to automatically segment data
- See how to build an intelligent recommender system
- Understand logic programming and how to use it
- Build automatic speech recognition systems
- Understand the basics of heuristic search and genetic programming
- Develop games using Artificial Intelligence
- Learn how reinforcement learning works
- Discover how to build intelligent applications centered on images, text, and time series data
- See how to use deep learning algorithms and build applications based on it

In Detail

Artificial Intelligence is becoming increasingly relevant in the modern world where everything is driven by technology and data. It is used extensively across many fields such as search engines, image recognition, robotics, finance, and so on. We will explore various real-world scenarios in this book and you'll learn about various algorithms that can be used to build Artificial Intelligence applications.

During the course of this book, you will find out how to make informed decisions about what algorithms to use in a given context. Starting from the basics of Artificial Intelligence, you will learn how to develop various building blocks using different data mining techniques. You will see how to implement different algorithms to get the best possible results, and will understand how to apply them to real-world scenarios. If you want to add an intelligence layer to any application that's based on images, text, stock market, or some other form of data, this exciting book on Artificial Intelligence will definitely be your guide!

Style and approach

This highly practical book will show you how to implement Artificial Intelligence. The book provides multiple examples enabling you to create smart applications to meet the needs of your organization. In every chapter, we explain an algorithm, implement it, and then build a smart application.

Editorial Review

About the Author

Prateek Joshi is an artificial intelligence researcher, published author of five books, and TEDx speaker. He is the founder of Pluto AI, a venture-funded Silicon Valley startup building an analytics platform for smart water management powered by deep learning. His work in this field has led to patents, tech demos, and research papers at major IEEE conferences. He has been an invited speaker at technology and entrepreneurship conferences including TEDx, AT&T Foundry, Silicon Valley Deep Learning, and Open Silicon Valley. Prateek has also been featured as a guest author in prominent tech magazines.

He frequently writes on topics such as artificial intelligence, Python programming, and abstract mathematics. He is an avid coder and has won many hackathons utilizing a wide variety of technologies. He graduated from University of Southern California with a master's degree specializing in artificial intelligence. He has worked at companies such as Nvidia and Microsoft Research.

Users Review

From reader reviews:

Lauren Marine:

Book is definitely written, printed, or outlined for everything. You can understand everything you want by a guide. Book has a different type. As you may know that book is important matter to bring us around the world. Beside that you can your reading talent was fluently. A e-book Artificial Intelligence with Python will make you to always be smarter. You can feel much more confidence if you can know about everything. But some of you think that will open or reading a book make you bored. It isn't make you fun. Why they could be thought like that? Have you in search of best book or appropriate book with you?

Pauline Mueller:

The book Artificial Intelligence with Python will bring you to definitely the new experience of reading some sort of book. The author style to describe the idea is very unique. In the event you try to find new book to see, this book very appropriate to you. The book Artificial Intelligence with Python is much recommended to you you just read. You can also get the e-book from your official web site, so you can more easily to read the book.

Clara Palmer:

Reading can called head hangout, why? Because when you are reading a book particularly book entitled Artificial Intelligence with Python your thoughts will drift away trough every dimension, wandering in each aspect that maybe mysterious for but surely can be your mind friends. Imaging every word written in a reserve then become one web form conclusion and explanation which maybe you never get ahead of. The Artificial Intelligence with Python giving you a different experience more than blown away your head but

also giving you useful details for your better life in this era. So now let us teach you the relaxing pattern at this point is your body and mind will be pleased when you are finished looking at it, like winning a game. Do you want to try this extraordinary paying spare time activity?

Maryann Warren:

Do you have something that you enjoy such as book? The book lovers usually prefer to select book like comic, brief story and the biggest you are novel. Now, why not striving Artificial Intelligence with Python that give your fun preference will be satisfied simply by reading this book. Reading practice all over the world can be said as the opportunity for people to know world a great deal better then how they react to the world. It can't be mentioned constantly that reading practice only for the geeky person but for all of you who wants to always be success person. So , for all of you who want to start studying as your good habit, you could pick Artificial Intelligence with Python become your own starter.
