Hemp Diseases and Pests: Management and Biological Control (Cabi) By J. M. McPartland, R. C. Clarke, D. P. Watson

Hemp is enjoying a worldwide resurgence. This unique book combines a review of the hemp pest and disease literature published over the past 50 years with up-to-date information on modern biological control techniques. Each pest and disease organism is presented in the same format, covering economic impact, geographical and host-plant range, plant symptoms, taxonomic description, life history, and differential diagnosis. Important cultural, mechanical, biological and chemical controls are highlighted with charts, illustrations and explicit instructions. Easy-to-use keys are included for rapid identification of the most common pests. Introductory chapters describe the general principles of plant protection, requirements for healthy plant growth, and taxonomy of parasites and pathogens.

Editorial Review

Review

"Spending several years on this project, McPartland et al have produced a useful and beautiful tome. Their work combines a review of the relevant literature published over the past half century with modern information on biological control techniques (the 22-page bibliography might be worth the cost of the book itself to some). Each pest and diseases organism is presented in similar, encyclopaedia-style format. Entries cover factors like economic impact, geographical and host-plant range, plant symptoms, taxonomic description, life history, and differential diagnosis. Excellent line drawings and photographs (including 86 colour plates) complement the information. As well, introductory chapters describe general principles of plant protection, requirements for healthy plant growth and the taxonomy of parasites and pathogens. ... Thorough, colourful and engrossing, *Hemp Diseases and Pests* is a hemp publishing event. Recommended."-

Users Review

From reader reviews:

Megan Snyder:

The book *Hemp Diseases and Pests: Management and Biological Control (Cabi)* gives you the sense of being enjoy for your spare time. You may use to make your capable a lot more increase. Book can for being your best friend when you getting stress or having big problem with your subject. If you can make reading through a book *Hemp Diseases and Pests: Management and Biological Control (Cabi)* to become your habit, you can get far more advantages, like add your own personal capable, increase your knowledge about a few or all subjects. It is possible to know everything if you like wide open and read a guide *Hemp Diseases and Pests: Management and Biological Control (Cabi)*. Kinds of book are several. It means that, science e-book

or encyclopedia or other individuals. So , how do you think about this e-book?

Teresa Ealy:

Reading a guide tends to be new life style in this particular era globalization. With studying you can get a lot of information that could give you benefit in your life. Together with book everyone in this world can share their idea. Publications can also inspire a lot of people. Many author can inspire their own reader with their story or maybe their experience. Not only the storyplot that share in the guides. But also they write about the data about something that you need illustration. How to get the good score toefl, or how to teach your sons or daughters, there are many kinds of book that exist now. The authors nowadays always try to improve their skill in writing, they also doing some study before they write with their book. One of them is this Hemp Diseases and Pests: Management and Biological Control (Cabi).

Mohammed Thomas:

Why? Because this Hemp Diseases and Pests: Management and Biological Control (Cabi) is an unordinary book that the inside of the reserve waiting for you to snap the item but latter it will distress you with the secret it inside. Reading this book alongside it was fantastic author who also write the book in such amazing way makes the content interior easier to understand, entertaining technique but still convey the meaning entirely. So , it is good for you for not hesitating having this anymore or you going to regret it. This amazing book will give you a lot of rewards than the other book have got such as help improving your expertise and your critical thinking method. So , still want to hold off having that book? If I were being you I will go to the guide store hurriedly.

Susan Brooks:

Do you have something that you like such as book? The guide lovers usually prefer to select book like comic, small story and the biggest some may be novel. Now, why not trying Hemp Diseases and Pests: Management and Biological Control (Cabi) that give your enjoyment preference will be satisfied through reading this book. Reading habit all over the world can be said as the method for people to know world considerably better then how they react to the world. It can't be mentioned constantly that reading routine only for the geeky particular person but for all of you who wants to possibly be success person. So , for every you who want to start looking at as your good habit, you can pick Hemp Diseases and Pests: Management and Biological Control (Cabi) become your personal starter.
