The book provides complete monographs for 725 common drugs, including generic and trade names, pronunciations, pregnancy risk category, controlled substance schedule (if appropriate), drug classes, therapeutic actions, indications, contraindications and cautions, available forms, dosages, pharmacokinetics, IV facts (if appropriate), adverse effects, interactions, and nursing considerations organized by nursing process steps (assessment, interventions, and teaching points).

The electronic ancillary, called the Web Toolkit, contains the latest FDA updates on new drugs, indications, and warnings; videos on safe drug administration; an audio pronunciation guide; an English-Spanish translator; mechanisms and sites of action graphics for selected drugs; updated NCLEX-style questions; a free CE test; bonus discounts; and more.
