Fuzzy Logic-Based Modeling in Collaborative and Blended Learning By Sofia J. Hadjileontiadou

Technology has dramatically changed the way in which knowledge is shared within and outside of traditional classroom settings. The application of fuzzy logic to new forms of technology-centered education has presented new opportunities for analyzing and modeling learner behavior.

Fuzzy Logic-Based Modeling in Collaborative and Blended Learning explores the application of the fuzzy set theory to educational settings in order to analyze the learning process, gauge student feedback, and enable quality learning outcomes. Focusing on educational data analysis and modeling in collaborative and blended learning environments, this publication is an essential reference source for educators, researchers, educational administrators and designers, and IT specialists.

This premier reference monograph presents key research on educational data analysis and modeling through the integration of research on advanced modeling techniques, educational technologies, fuzzy concept maps, hybrid modeling, neuro-fuzzy learning management systems, and quality of interaction.

Editorial Review

Review

This book provides a valuable contribution to the existing literature of e-learning and related research methodologies. It offers both a breadth and depth of coverage in issues linking fuzzy logic, e-learning, collaborative and blended learning, instructional design and knowledge modelling, along with efficient analytical tools that cannot be easily found elsewhere. This book should be included in any academic and research library since it can serve as a valuable resource and reference book for academics, researchers, educators, post graduate students and practitioners in a full range of e-learning fields. --*Professor Athanassios Jimoyiannis, Department of Social and Educational Policy, University of Peloponnese, Greece*

About the Author

Sofia J. Hadjileontiadou received the Diploma degree in Civil Engineering in 1986 and the Ph.D. degree in Educational Technology in 2000, both from the Aristotle University of Thessaloniki (AUTH), Thessaloniki, Greece. She also holds a Msc in Environmental Engineering. Currently, she is principal of SEK an educational structure within VET, tutor at the Master's in Education (M.Ed) program of the Hellenic Open University and research associate at the 1-Year Programme of Pedagogical Training (EPPAIK) at the School of Pedagogical and Technological Education of Greece. She received the best full paper award at the ICALT'2004 conference of IEEE. Her research interests include educational technology, ICT mediated collaboration, blended learning, innovation in didactics, environmental education and fuzzy logic applications upon educational data. She has published 20 papers in peer reviewed international journals, 40 papers in peer reviewed international conference proceedings and 7 book chapters. She is a member of the Technical Chamber of Greece, the Greek Society of the Teachers of Environmental Education and the Greek Scientific Society of ICT in Education.

Sofia B. Dias currently works as a Researcher Assistant at the Faculty of Human Kinetics, University of Lisbon, Portugal. She embraced a Ph.D. in Science Education, specialty of Analysis and Organization of Educational Systems, financed by a project grant awarded by the Foundation for Science and Technology (FCT-Portugal). In 2007 she received an award of the Best Students University of Lisbon (UTL/Santander). She has published 2 books, 1 book chapter, 5 papers in peer reviewed international journals and 7 papers in peer reviewed international conference proceedings. Since 2011 she is peer reviewer of several international journals, namely: Computers & Education, The Internet & Higher Education, Interactive Learning Environments, Educational Research & Reviews, Academic Proceedings in Engineering Sciences, Systems, and Journal of Medical Internet Research. Just recently, she has won a 5-year FCT Postdoctoral grant for exploring blended, collaborative and affective learning in Higher Education. Her research interests and current projects focus on blended learning, ICT in education, learning management systems and intelligent modelling of learning processes.

Users Review

From reader reviews:

Donald Hamann:

Here thing why this kind of Fuzzy Logic-Based Modeling in Collaborative and Blended Learning are different and reputable to be yours. First of all looking at a book is good nevertheless it depends in the

content of the usb ports which is the content is as yummy as food or not. Fuzzy Logic-Based Modeling in Collaborative and Blended Learning giving you information deeper since different ways, you can find any e-book out there but there is no guide that similar with Fuzzy Logic-Based Modeling in Collaborative and Blended Learning. It gives you thrill reading journey, its open up your current eyes about the thing in which happened in the world which is maybe can be happened around you. You can easily bring everywhere like in park your car, café, or even in your method home by train. When you are having difficulties in bringing the paper book maybe the form of Fuzzy Logic-Based Modeling in Collaborative and Blended Learning in e-book can be your alternative.

Michelle Chase:

Do you considered one of people who can't read satisfying if the sentence chained inside the straightway, hold on guys this particular aren't like that. This Fuzzy Logic-Based Modeling in Collaborative and Blended Learning book is readable by means of you who hate those straight word style. You will find the info here are arrange for enjoyable studying experience without leaving possibly decrease the knowledge that want to deliver to you. The writer involving Fuzzy Logic-Based Modeling in Collaborative and Blended Learning content conveys objective easily to understand by lots of people. The printed and e-book are not different in the content but it just different available as it. So , do you continue to thinking Fuzzy Logic-Based Modeling in Collaborative and Blended Learning is not loveable to be your top record reading book?

Dorinda Kling:

Would you one of the book lovers? If yes, do you ever feeling doubt when you are in the book store? Make an effort to pick one book that you find out the inside because don't evaluate book by its handle may doesn't work this is difficult job because you are frightened that the inside maybe not seeing that fantastic as in the outside appearance likes. Maybe you answer might be Fuzzy Logic-Based Modeling in Collaborative and Blended Learning why because the great cover that make you consider regarding the content will not disappoint a person. The inside or content is fantastic as the outside as well as cover. Your reading sixth sense will directly show you to pick up this book.

Kevin Blais:

In this particular era which is the greater man or woman or who has ability in doing something more are more precious than other. Do you want to become certainly one of it? It is just simple approach to have that. What you are related is just spending your time not much but quite enough to get a look at some books. One of the books in the top listing in your reading list is usually Fuzzy Logic-Based Modeling in Collaborative and Blended Learning. This book which is qualified as The Hungry Hillsides can get you closer in turning out to be precious person. By looking right up and review this guide you can get many advantages.
