Aerospace Navigation Systems From Wiley

Compiled by leading authorities, *Aerospace Navigation Systems* is a compendium of chapters that present modern aircraft and spacecraft navigation methods based on up-to-date inertial, satellite, map matching and other guidance techniques. Ranging from the practical to the theoretical, this book covers navigational applications over a wide range of aerospace vehicles including aircraft, spacecraft and drones, both remotely controlled and operating as autonomous vehicles. It provides a comprehensive background of fundamental theory, the utilisation of newly-developed techniques, incorporates the most complex and advanced types of technical innovation currently available and presents a vision for future developments. Satellite Navigation Systems (SNS), long range navigation systems, short range navigation systems and navigational displays are introduced, and many other detailed topics include Radio Navigation Systems (RNS), Inertial Navigation Systems (INS), Homing Systems, Map Matching and other correlated-extremalsystems, and both optimal and sub-optimal filtering in integrated navigation systems.

Editorial Review

About the Author

Alexander V. Nebylov, State University of Aerospace Instrumentation, Russia

Professor and Chairman of Aerospace Devices and Measuring Complexes, State University of Aerospace Instrumentation in St. Petersburg and Director of the International Institute for Advanced Aerospace Technologies. He is a member of the leadership of the IFAC Aerospace Technical Committee since 2002.

Dr. Joseph Watson, Swansea University, UK

Dr. Joseph Watson is retired former Associate Editor of the IEEE Sensors Journal and Visiting Professor at the University of Calgary, Canada, the University of California, Davis and Santa Barbara. He is a Fellow of IET, Senior Member of the IEEE. Dr. Watson has continued as President of the UK-based Gas Analysis and Sensing Group.

Users Review

From reader reviews:

Donald Calderon:

Why don't make it to become your habit? Right now, try to ready your time to do the important take action, like looking for your favorite e-book and reading a publication. Beside you can solve your condition; you can add your knowledge by the publication entitled Aerospace Navigation Systems. Try to stumble through book Aerospace Navigation Systems as your pal. It means that it can be your friend when you truly feel alone and beside those of course make you smarter than previously. Yeah, it is very fortunated to suit your needs. The book makes you a lot more confidence because you can know everything by the book. So , let us make new experience as well as knowledge with this book.

James Bauer:

The book Aerospace Navigation Systems give you a sense of feeling enjoy for your spare time. You should use to make your capable much more increase. Book can for being your best friend when you getting anxiety or having big problem using your subject. If you can make looking at a book Aerospace Navigation Systems being your habit, you can get more advantages, like add your own personal capable, increase your knowledge about a number of or all subjects. You may know everything if you like wide open and read a e-book Aerospace Navigation Systems. Kinds of book are a lot of. It means that, science publication or encyclopedia or other people. So , how do you think about this book?

Ronald Stauffer:

Reading a book can be one of a lot of task that everyone in the world enjoys. Do you like reading book thus. There are a lot of reasons why people fantastic. First reading a reserve will give you a lot of new details. When you read a guide you will get new information because book is one of many ways to share the

information or maybe their idea. Second, reading a book will make an individual more imaginative.
