Algebra (Graduate Texts in Mathematics) By Serge Lang

This book is intended as a basic text for a one year course in algebra at the graduate level or as a useful reference for mathematicians and professionals who use higher-level algebra. This book successfully addresses all of the basic concepts of algebra. For the new edition, the author has added exercises and made numerous corrections to the text. From MathSciNet's review of the first edition: "The author has an impressive knack for presenting the important and interesting ideas of algebra in just the "right" way, and he never gets bogged down in the dry formalism which pervades some parts of algebra."

Editorial Review

Review

S. Lang

Algebra

*"Lang's Algebra changed the way graduate algebra is taught, retaining classical topics but introducing language and ways of thinking from category theory and homological algebra. It has affected all subsequent graduate-level algebra books."*NOTICES OF THE AMS

*"The author has an impressive knack for presenting the important and interesting ideas of algebra in just the 'right' way, and he never gets bogged down in the dry formalism which pervades some parts of algebra."*MATHEMATICAL REVIEWS

From the reviews of the third edition:

"The current third edition has grown again ... dealing with topics close to the author's heart from number theory, function theory and algebraic geometry. For the math graduate who wants to broaden his education this is an excellent account; apart from standard topics it picks out many items from other fields This makes it a fascinating book to read ... a very readable treatment of many modern mainline topics as well as some interesting out-of-the-way items." (Paul M. Cohn, Zentralblatt MATH, Vol. 984, 2003)

"Lang's Algebra ... has gained an iconic status, due both to the comprehensiveness of its coverage and its ability to be authoritative and lively at the same time. ... a revolutionary work, changing the way in which graduate algebra was taught. ... the author describes the book as 'very stable', indicating that there is little that he has wished to change. This confidence is reflected in the wider mathematical community, and ... this new printing deserves a place in every university departmental library." (Gerry Leversha, The Mathematical Gazette, Vol. 87 (509), 2003)

From the Back Cover

This book is intended as a basic text for a one-year course in Algebra at the graduate level, or as a useful reference for mathematicians and professionals who use higher-level algebra. It successfully addresses the basic concepts of algebra. For the revised third edition, the author has added exercises and made numerous corrections to the text.

Comments on Serge Lang's Algebra:

Lang's Algebra changed the way graduate algebra is taught, retaining classical topics but introducing language and ways of thinking from category theory and homological algebra. It has affected all subsequent graduate-level algebra books.

April 1999 Notices of the AMS, announcing that the author was awarded the Leroy P. Steele Prize for Mathematical Exposition for his many mathematics books.

The author has an impressive knack for presenting the important and interesting ideas of algebra in just the "right" way, and he never gets bogged down in the dry formalism which pervades some parts of algebra.

Users Review

From reader reviews:

Gary Sandler:

Book is definitely written, printed, or illustrated for everything. You can understand everything you want by a reserve. Book has a different type. To be sure that book is important matter to bring us around the world. Close to that you can your reading expertise was fluently. A e-book Algebra (Graduate Texts in Mathematics) will make you to end up being smarter. You can feel a lot more confidence if you can know about everything. But some of you think which open or reading a new book make you bored. It isn't make you fun. Why they can be thought like that? Have you searching for best book or acceptable book with you?

Brenda Lee:

This Algebra (Graduate Texts in Mathematics) book is just not ordinary book, you have after that it the world is in your hands. The benefit you get by reading this book is usually information inside this publication incredible fresh, you will get data which is getting deeper you actually read a lot of information you will get. That Algebra (Graduate Texts in Mathematics) without we know teach the one who reading it become critical in pondering and analyzing. Don't end up being worry Algebra (Graduate Texts in Mathematics) can bring any time you are and not make your case space or bookshelves' turn into full because you can have it in your lovely laptop even cellphone. This Algebra (Graduate Texts in Mathematics) having good arrangement in word in addition to layout, so you will not truly feel uninterested in reading.

Gay Swiderski:

In this time globalization it is important to someone to obtain information. The information will make a professional understand the condition of the world. The condition of the world makes the information simpler to share. You can find a lot of references to get information example: internet, classifieds, book, and soon. You can view that now, a lot of publisher that print many kinds of book. The book that recommended for you is Algebra (Graduate Texts in Mathematics) this guide consist a lot of the information with the condition of this world now. This book was represented just how can the world has grown up. The words styles that writer use for explain it is easy to understand. The actual writer made some study when he makes this book. That's why this book acceptable all of you.

Donald Goodman:

That publication can make you to feel relax. This particular book Algebra (Graduate Texts in Mathematics) was colorful and of course has pictures around. As we know that book Algebra (Graduate Texts in Mathematics) has many kinds or category. Start from kids until youngsters. For example Naruto or Private eye Conan you can read and feel that you are the character on there. Therefore , not at all of book are make you bored, any it makes you feel happy, fun and chill out. Try to choose the best book for you personally and try to like reading which.
