Chemical Reaction Engineering and Reactor Technology (Chemical Industries) By Tapio O. Salmi, Jyri-Pekka Mikkola, Johan P. Warna

The role of the chemical reactor is crucial for the industrial conversion of raw materials into products and numerous factors must be considered when selecting an appropriate and efficient chemical reactor. **Chemical Reaction Engineering and Reactor Technology** defines the qualitative aspects that affect the selection of an industrial chemical reactor and couples various reactor models to case-specific kinetic expressions for chemical processes.

Offering a systematic development of the chemical reaction engineering concept, this volume explores:

- Essential stoichiometric, kinetic, and thermodynamic terms needed in the analysis of chemical reactors
- Homogeneous and heterogeneous reactors
- Residence time distributions and non-ideal flow conditions in industrial reactors
- Solutions of algebraic and ordinary differential equation systems
- Gas- and liquid-phase diffusion coefficients and gas-film coefficients
- Correlations for gas-liquid systems
- Solubilities of gases in liquids
- Guidelines for laboratory reactors and the estimation of kinetic parameters

The authors pay special attention to the exact formulations and derivations of mass energy balances and their numerical solutions. Richly illustrated and containing exercises and solutions covering a number of processes, from oil refining to the development of specialty and fine chemicals, the text provides a clear understanding of chemical reactor analysis and design.

Chemical Reaction Engineering and Reactor Technology (Chemical Industries) By Tapio O. Salmi, Jyri-Pekka Mikkola, Johan P. Warna **Bibliography**

- Sales Rank: #4604364 in Books
- Brand: Brand: CRC Press
- Published on: 2010-08-30
- Original language: English
- Number of items: 1
- Dimensions: 10.00" h x 1.38" w x 7.01" l, .0 pounds
- Binding: Hardcover
- 648 pages

Editorial Review

About the Author

Tapio Salmi is a professor of chemical reaction engineering at Abo Akademi in Abo-Turku, Finland.

Jyri-Pekka Mikkola is a professor of industrial chemistry at Umea University in Sweden and Abo Akademi in Abo-Turku, Finland.

Johan P. Warnais is a professor of chemical reaction engineering at Abo Akademi in Abo-Turku, Finland.

Users Review

From reader reviews:

Jack Evans:

Book is usually written, printed, or outlined for everything. You can realize everything you want by a guide. Book has a different type. We all know that that book is important point to bring us around the world. Alongside that you can your reading proficiency was fluently. A e-book Chemical Reaction Engineering and Reactor Technology (Chemical Industries) will make you to become smarter. You can feel far more confidence if you can know about every thing. But some of you think this open or reading a new book make you bored. It isn't make you fun. Why they are often thought like that? Have you in search of best book or appropriate book with you?

Harry Crawford:

What do you think about book? It is just for students as they are still students or the item for all people in the world, what best subject for that? Just simply you can be answered for that question above. Every person has various personality and hobby for every single other. Don't to be pressured someone or something that they don't wish do that. You must know how great as well as important the book Chemical Reaction Engineering and Reactor Technology (Chemical Industries). All type of book could you see on many methods. You can look for the internet solutions or other social media.

Jill Vaughn:

This book untitled Chemical Reaction Engineering and Reactor Technology (Chemical Industries) to be one of several books which best seller in this year, honestly, that is because when you read this reserve you can get a lot of benefit on it. You will easily to buy that book in the book retail outlet or you can order it through online. The publisher on this book sells the e-book too. It makes you more readily to read this book, as you can read this book in your Touch screen phone. So there is no reason to you to past this publication from your list.

Robert Araiza:

Reading a book can be one of a lot of activity that everyone in the world adores. Do you like reading book therefore. There are a lot of reasons why people enjoyed. First reading a reserve will give you a lot of new info. When you read a reserve you will get new information mainly because book is one of numerous ways to share the information or even their idea. Second, reading a book will make a person more imaginative. When you looking at a book especially fiction book the author will bring you to imagine the story how the personas do it anything. Third, it is possible to share your knowledge to others. When you read this Chemical Reaction Engineering and Reactor Technology (Chemical Industries), you may tells your family, friends along with soon about yours e-book. Your knowledge can inspire different ones, make them reading a publication.
