## Global Population Health and Well- Being in the 21st Century: Toward New Paradigms, Policy, and Practice By George Lueddeke PhD

*"This book provides an excellent foundation for students seeking a context for global models and practices in population health...an excellent primer for those who are ready to engage in global health projects."*

**--Jay E. Maddock, PsycCRITIQUES**

*"A must read for public health, clinical, and social care students, teachers, and practitioners alike, including case studies to provide a thorough and up-to-date account of the past, present, and future of global public health. Dr Lueddeke effectively highlights the ingenuity gap between today's wicked problems and their potential solutions, with a timely emphasis on the concepts of "planetary health" and "integrative ecological public health"... [A] very informative and groundbreaking read."*

**-- Dr Behrooz Behbod, MB ChB MSc ScD MFPH, Founder, Oxford Public Health Ltd, Oxford Book Review**

*"This book delivers a timely and holistic perspective on population health, providing data and support for innovating and integrating clinical medicine, public health, wellness practices, and healthcare education worldwide... Fills a gap in the literature by addressing population health from a global perspective and considering global public health from the viewpoints of the individual and from the biopsychosocial model of health. Score: 93 - 4 Stars!"*

**--Ruthann Russo, PhD, JD, MPH, LAc, The College of New Jersey, Doody's Reviews**

*"This is a remarkable, much-needed book that fills a significant gap in the health and social care literature in the early decades of the 21st century - public, global, clinical, ecological. It is powerful, ambitious, comprehensive, and sweeping at the same time that it is visionary, focused, and deep. Its power and passion are about the potential of population health and well-being optimally*

*applied around the globe to help in creating a world that is healthier, safer, more just, and more sustainable."*

**--Barbara K. Rimer, DrPH, Alumni Distinguished Professor and Dean, UNC Gillings School of Global Public Health, University of North Carolina at Chapel Hill (From the Foreword)**

Drawing on current research and the expertise of world-recognized leaders in public, global, clinical, and social health in both developed and developing nations, this book delivers an evidence-based examination of 21st-century challenges in global population health and well-being.

With special attention given to major initiatives of the United Nations, especially its Sustainable Development Goals (SDGs) 2016 - 2030, and the priorities of the World Health Organization (WHO) and the World Bank, Dr. Lueddeke articulates an imperative to adopt a "One World, One Health" view that recognizes the interdependence of humans, animals, plants, and the environment.

The book/text promotes innovative and transformative paradigms for global public health practice, curricula, workforce training, and leadership. Intended for undergraduate and postgraduate courses in global public health, it will also be a welcome addition to the libraries of practitioners and policy-makers at all levels in the public/population/global health continuum.

**KEY CONTENT AREAS INCLUDE:**

- The historical context of public health from early medicine to present day
- Exemplary educational initiatives: WHO education guidelines; curriculum commentaries from China, South Africa, and Cuba; a proposed Global Framework for Public Health Services and Functions; and case studies from South America (PAHO/ WHO), India (IPHF), and South Africa (PHASA)
- The changing roles and educational expectations of public and global health professionals in the early decades of the 21st century
- The complex interdependence of natural, socioeconomic, and political systems at local, national, regional, and global levels
- The causes of interstate conflicts and longer-term challenges
- Leading change in a new era, transforming mind-sets, and improving and sustaining the health and well-being of the planet and its people
- An epilogue on global health, governance, and education with contributions from a think tank of 35 practitioners from 27 nations
- Supplemental materials, including text aims and objectives and a guide to research and learning resources developed by experts in the United States, Brazil, and the Netherlands, are available as digital downloads

**ALSO HIGHLIGHTED:**

- 65 profiles of leading global health (and health-related) organizations
- 15 profiles of highly recognized schools and institutes of public health

### **Editorial Review**

#### About the Author

Publishing widely on educational transformation, innovation, and leadership, his latest book, *Transforming Medical Education for the 21st Century: Megatrends, Priorities and Change*, now also translated into complex Chinese, complements and builds on the seminal *Lancet* Commission global report “Health Professionals for a New Century: Transforming Education to Strengthen Health Systems in an Interdependent World.”

Invitations he has received as a keynote speaker/presenter include, among others, the UK General Medical Council (GMC, London); Universitas 21 UN Millennium Development Goal Workshops (UNMDG, Dublin); the Association of Schools of Public Health in the European Region (ASPHER, Brussels, Maastricht); the American Medical Association (AMA, Chicago); the Public Health Association of South Africa (PHASA, Polokwane); the European Public Health Association (EUPHA, Glasgow); the Catharina Pijls Lecture for the Annual Maastricht Symposium on Global and European Health (Maastricht University); the World Mental Health Association (WMHA, Athens); and the Faculty of Nursing (Chiang Mai University, Thailand) international conference on “Optimizing Healthcare Quality: Teamwork in Education, Research, and Practice.”

He lives in the New Forest, England, with his wife Jill and family members.

### **Users Review**

#### **From reader reviews:**

##### **Natalia Burton:**
