About the Author

Roger A. Freedman is a Lecturer in Physics at the University of California, Santa Barbara, USA. At UCSB, Dr. Freedman has taught in both the Department of Physics and the College of Creative Studies, a branch of the university intended for highly gifted and motivated undergraduates. He has published research in nuclear physics, elementary particle physics, and laser physics. In recent years, he has helped to develop computer-based tools for learning introductory physics and astronomy and helped pioneer the use of classroom response systems and the "flipped" classroom model at UCSB. He is co-author of three introductory textbooks: *University Physics* (Pearson), *Universe* (Freeman), and *Investigating Astronomy* (Freeman). Robert M. Geller teaches and conducts research in astrophysics at the University of California, Santa Barbara, USA. Using data from the Hubble Space Telescope, he is currently involved in a search for bursts of lights that are predicted to occur when a supermassive black hole consumes a star. Dr. Gellar als has a strong emphasis on education, and he received the Distinguished Teaching Award at UCSB in 2003. William J. Kaufman III (deceased) was the author of the first four editions of *Universe*. During his career he held positions at the Griffith Observatory in Los Angeles, San Diego State University, UCLA, Caltech, and the University of Illinois, USA. A prolific author, his many books include *Black Holes and Warped Spacetime*, *Relativity and Cosmology*, *The Cosmic Frontiers of General Relativity*, *Exploration of the Solar System*, *Planets and Moons*, *Stars and Nebulas*, *Galaxies and Quasars*, and *Supercomputing and the Transformation of Science*. Dr. Kaufmann died in 1994.

Users Review

From reader reviews:

Seth Sawyer:

Book will be written, printed, or descriptive for everything. You can realize everything you want by a reserve. Book has a different type. As it is known to us that book is important thing to bring us around the world. Beside that you can your reading talent was fluently. A guide *Universe: The Solar System* will make you to become smarter. You can feel far more confidence if you can know about every little thing. But some of you think in which open or reading some sort of book make you bored. It is not make you fun. Why they might be thought like that? Have you looking for best book or appropriate book with you?

Tyrone Knudson:

What do you concerning book? It is not important to you? Or just adding material when you need something to explain what you problem? How about your extra time? Or are you busy man? If you don't have spare time to complete others business, it is make you feel bored faster. And you have spare time? What did you do? Every person has many questions above. They have to answer that question mainly because just their can do that will. It said that about e-book. Book is familiar in each person. Yes, it is suitable. Because start from on pre-school until university need this specific *Universe: The Solar System* to read.

Suk Barry:

Information is provisions for individuals to get better life, information presently can get by anyone on everywhere. The information can be a know-how or any news even a problem. What people must be consider while those information which is in the former life are challenging be find than now's taking seriously which one is suitable to believe or which one the actual resource are convinced. If you receive the unstable resource then you obtain it as your main information you will have huge disadvantage for you. All those possibilities will not happen inside you if you take Universe: The Solar System as your daily resource information.

Floyd Brown:

Universe: The Solar System can be one of your beginner books that are good idea. We recommend that straight away because this reserve has good vocabulary that could increase your knowledge in terminology, easy to understand, bit entertaining but delivering the information. The article writer giving his/her effort that will put every word into pleasure arrangement in writing Universe: The Solar System nevertheless doesn't forget the main position, giving the reader the hottest and based confirm resource info that maybe you can be one among it. This great information may drawn you into brand new stage of crucial thinking.
