Pro iOS and Android Apps for Business: with jQuery Mobile, node.js, and MongoDB By Frank Zammetti

With *Pro iOS and Android Apps for Business*, you can take your web development experience and apply it toward creating a full-featured business app, from soup to nuts. Frank Zammetti shows you how to create a client app using jQuery Mobile wrapped in PhoneGap, and how to create a node.js-based server that uses MongoDB as its data store.

You never have to deal with learning Objective-C, Java or any other difficult-to-learn language. Instead, you can build on your existing HTML5, JavaScript and CSS experience to quickly and effectively build any app your business needs. You can apply this knowledge to iOS and Android apps as well as other mobile platforms since the technologies used support most modern mobile platforms as well.

You'll learn:

- How to design a full-featured app, including requirements like offline access
- How to build the client-side of the app using jQuery Mobile, including adding stub code for calling the node.js server
- How to create a simple server with node.js and interact with it using REST
- How to use MongoDB with node.js for data storage
- How to use PhoneGap to ready your app for mobile deployment
- How to test and debug your app on iOS and Android

Pro iOS and Android Apps for Business is for experienced web developers who need to get up to speed quickly in building iOS and Android apps for business. Are you ready to join the mobile revolution using the same technologies you already use to build great web applications? If so, this is the book for you!

Editorial Review

About the Author

Frank W. Zammetti is a web architect specialist for a leading worldwide financial company by day, and a PocketPC and open-source developer by night. He is the founder and chief software architect of Omnytex Technologies, a PocketPC development house. He has over 12 years of "professional" experience in the information technology field, and over 12 more of "amateur" experience. He began his nearly life-long love of computers at age 7, when he became one of four students chosen to take part in his school district's pilot computer program. A year later, he was the only participant left! The first computer Frank owned was a Timex Sinclair 1000 in 1982, on which he wrote a program to look up movie times for all of Long Island (and without the 16k expansion module!). After that, he moved on to a Commodore 64 and spent about 4 years doing nothing but assembly programming (games mostly). He finally got his first IBM-compatible PC in 1987, and began learning the finer points of programming (as they existed at that time!). Frank has primarily developed web-based applications for about 8 years. Before that, he developed Windows-based client/server applications in a variety of languages. Frank holds numerous certifications including SCJP, MCSD, CNA, i-Net+, A+, CIW, MCP, and numerous BrainBench certifications. He is a contributor to a number of open source projects, including DataVision, Struts, PocketFrog, and Jakarta Commons. In addition, Frank has started two projects: Java Web Parts and The Struts Web Services Enablement Project. He also was one of the founding members of a project that created the first fully functioning Commodore 64 emulator for PocketPC devices (PocketHobbit). Frank has authored various articles on topics that range from integrating DataVision into web apps, to using Ajax in Struts-based applications. He is working on a new application framework specifically geared to creating next-generation web applications.

Users Review

From reader reviews:

Darren Marshall:

This Pro iOS and Android Apps for Business: with jQuery Mobile, node.js, and MongoDB is great publication for you because the content which is full of information for you who all always deal with world and still have to make decision every minute. This particular book reveal it details accurately using great organize word or we can say no rambling sentences within it. So if you are read this hurriedly you can have whole data in it. Doesn't mean it only provides you with straight forward sentences but tough core information with lovely delivering sentences. Having Pro iOS and Android Apps for Business: with jQuery Mobile, node.js, and MongoDB in your hand like getting the world in your arm, details in it is not ridiculous one particular. We can say that no publication that offer you world with ten or fifteen second right but this e-book already do that. So , this is certainly good reading book. Hello Mr. and Mrs. hectic do you still doubt that will?

Eunice Buckley:

In this time globalization it is important to someone to obtain information. The information will make anyone to understand the condition of the world. The condition of the world makes the information easier to share. You can find a lot of recommendations to get information example: internet, newspapers, book, and

soon. You can observe that now, a lot of publisher that print many kinds of book. The particular book that recommended for you is Pro iOS and Android Apps for Business: with jQuery Mobile, node.js, and MongoDB this guide consist a lot of the information with the condition of this world now. This kind of book was represented how can the world has grown up. The vocabulary styles that writer use to explain it is easy to understand. The writer made some investigation when he makes this book. Here is why this book appropriate all of you.

Katherine Khan:

That book can make you to feel relax. This kind of book Pro iOS and Android Apps for Business: with jQuery Mobile, node.js, and MongoDB was vibrant and of course has pictures on there. As we know that book Pro iOS and Android Apps for Business: with jQuery Mobile, node.js, and MongoDB has many kinds or variety. Start from kids until teens. For example Naruto or Detective Conan you can read and feel that you are the character on there. So , not at all of book are make you bored, any it makes you feel happy, fun and rest. Try to choose the best book to suit your needs and try to like reading in which.

John Smith:

A lot of reserve has printed but it is different. You can get it by net on social media. You can choose the top book for you, science, comedy, novel, or whatever by simply searching from it. It is called of book Pro iOS and Android Apps for Business: with jQuery Mobile, node.js, and MongoDB. Contain your knowledge by it. Without leaving behind the printed book, it might add your knowledge and make anyone happier to read. It is most important that, you must aware about reserve. It can bring you from one location to other place.
