Project Management for Facility Constructions: A Guide for Engineers and Architects By Alberto De Marco

This book describes concepts, methods and practical techniques for managing projects to develop constructed facilities in the fields of oil & gas, power, infrastructure, architecture and the commercial building industries.

It is addressed to a broad range of professionals willing to improve their management skills and designed to help newcomers to the engineering and construction industry understand how to apply project management to field practice. Also, it makes project management disciplines accessible to experts in technical areas of engineering and construction.

In education, this text is suitable for undergraduate and graduate classes in architecture, engineering and construction management, as well as for specialist and professional courses in project management.

Editorial Review

Review

From the reviews:

“De Marco (Polytechnic Univ. of Turin, Italy) addresses the issues related to managing construction projects, from the vantage point of the performing organization, in 14 chapters. ... De Marco also discusses important tools for cost estimating, scheduling, and cost management. This book will be useful for a lower-division undergraduate introductory course in construction management at both two- and four-year colleges. Summing Up: Recommended. All undergraduate students.” (P. F. Rad, *Choice*, Vol. 49 (3), November, 2011)

From the Back Cover

This book describes concepts, methods and practical techniques for managing projects to develop constructed facilities in the fields of oil & gas, power, infrastructure, architecture and the commercial building industries.

It is addressed to a broad range of professionals willing to improve their management skills and designed to help newcomers to the engineering and construction industry understand how to apply project management to field practice. Also, it makes project management disciplines accessible to experts in technical areas of engineering and construction.

In education, this text is suitable for undergraduate and graduate classes in architecture, engineering and construction management, as well as for specialist and professional courses in project management.

About the Author

Alberto De Marco, MSc, PhD

Dr. Alberto De Marco is assistant professor of Project Management and Industrial Facilities at Politecnico di Torino. He also provides executive education in the area of Project Management at the University of Bozen, Università Cattolica Milan, and other institutions. He is appointed professor at the Sino-Italian campus in the Tongji University, Shanghai (China). In 2006, he was at the Massachusetts Institute of Technology as a visiting professor for the Project Management class.

He worked as a post-doc scholar in the field of complexity science applied to system project management. Research and consulting activities are in fields of industrial and social facility construction management, facility management, financial planning, and public-private partnerships.

He formerly worked as a project manager in France and Italy. He founded and directed a start-up company delivering IT solutions for construction industries.

Alberto De Marco earned his M.Sc. in Building Engineering and Ph.D. in Construction Management from Politecnico di Torino. He attended part of his graduate education at the Ecole Nationale des Ponts et

Chaussées in Paris.

Users Review

From reader reviews:

Warner Samuels:

This Project Management for Facility Constructions: A Guide for Engineers and Architects usually are reliable for you who want to certainly be a successful person, why. The reason why of this Project Management for Facility Constructions: A Guide for Engineers and Architects can be on the list of great books you must have is actually giving you more than just simple studying food but feed you with information that maybe will shock your previous knowledge. This book is usually handy, you can bring it everywhere you go and whenever your conditions in the e-book and printed versions. Beside that this Project Management for Facility Constructions: A Guide for Engineers and Architects giving you an enormous of experience for example rich vocabulary, giving you trial run of critical thinking that we know it useful in your day exercise. So , let's have it and enjoy reading.

Patsy Kuster:

Reading a book for being new life style in this season; every people loves to go through a book. When you go through a book you can get a wide range of benefit. When you read guides, you can improve your knowledge, simply because book has a lot of information on it. The information that you will get depend on what forms of book that you have read. If you need to get information about your review, you can read education books, but if you act like you want to entertain yourself look for a fiction books, these kinds of us novel, comics, in addition to soon. The Project Management for Facility Constructions: A Guide for Engineers and Architects will give you a new experience in reading a book.

Joan Beverly:

It is possible to spend your free time to see this book this publication. This Project Management for Facility Constructions: A Guide for Engineers and Architects is simple to deliver you can read it in the recreation area, in the beach, train and also soon. If you did not possess much space to bring the particular printed book, you can buy the actual e-book. It is make you much easier to read it. You can save the book in your smart phone.
