The Encyclopedia of Ancient Giants in North America chronicles two distinct waves of giant humans migrating to North America. As early as 7,000 B.C., strange people arrived on the North American shores of gigantic size with Neanderthal looking skulls. Their spread across the American landscape is documented not only by their massive skeletons but by an identical material culture that was found buried with their remains. Double rows of teeth and skulls with protruding horns make them one of America's most intriguing mysteries. At the advent of the Bronze Age another migration of giant humans found their way to North America. A persistent legend exists with Native Americans of a people who came to trade and mine the copper from the Upper Great Lakes. They left an indelible mark upon the landscape of the Ohio Valley with their large burial mounds and earthworks aligned to solar, lunar and stellar events. The measurements of these works reveal that they were constructed with the knowledge of advanced mathematics.

Editorial Review

Review

Zimmerman's book will plunge the reader into the world of the arcane, filled with tall tails--no pun intended--of giants who once roamed the land where shopping malls now stand. His new book, *The Encyclopedia of Giants* is a welcome addition to his growing body of work and I predict may be the go-to book for researchers and those of us who are interested in the subject matter.

Zimmerman is a class A researcher, often spending hundreds of hours in archives going through countless antiquated newspapers, journals and other publications, sifting through stories and assembling what may be the most thorough book on the subject of the giants that once roamed the Americas.

Unlike many authors who never visit the sites they write about, Zimmerman gets out in the field and explores the vestiges of what he and I both believe are a remnant of the Nephilim tribes that fled the conquest of Canaan, by the Israelites, thousands of years ago.

Zimmerman makes his case that the history we have been told has been managed carefully by those who seem to have an agenda. As you go through Zimmerman's book chapter by chapter the startling evidence he presents begins to build a case that we have not been told the truth. That the history that we were taught in our schools for hundreds of years and even in modernity, in some of our most prestigious universities, are in fact, a deliberate obfuscation of what I believe is the real history of the world.

Zimmerman is a champion of the truth and his indefatigable quest for it knows no bounds. He's truly *On the trail of the Nephilim!*
