Practical Electronics for Inventors, Fourth Edition By Paul Scherz, Simon Monk

A Fully-Updated, No-Nonsense Guide to Electronics

Advance your electronics knowledge and gain the skills necessary to develop and construct your own functioning gadgets. Written by a pair of experienced engineers and dedicated hobbyists, *Practical Electronics for Inventors*, Fourth Edition, lays out the essentials and provides step-by-step instructions, schematics, and illustrations. Discover how to select the right components, design and build circuits, use microcontrollers and ICs, work with the latest software tools, and test and tweak your creations. This easy-to-follow book features new instruction on programmable logic, semiconductors, operational amplifiers, voltage regulators, power supplies, digital electronics, and more.

Practical Electronics for Inventors, Fourth Edition, covers:

- Resistors, capacitors, inductors, and transformers
- Diodes, transistors, and integrated circuits
- Optoelectronics, solar cells, and phototransistors
- Sensors, GPS modules, and touch screens
- Op amps, regulators, and power supplies
- Digital electronics, LCD displays, and logic gates
- Microcontrollers and prototyping platforms
- Combinational and sequential programmable logic
- DC motors, RC servos, and stepper motors
- Microphones, audio amps, and speakers
- Modular electronics and prototypes

Editorial Review

About the Author

Paul Scherz is a Systems Operation Manager who received his B.S. in physics from the University of Wisconsin. He is an inventor/hobbyist in electronics, an area he grew to appreciate through his experience at the University's Department of Nuclear Engineering and Engineering Physics and the Department of Plasma Physics.

Dr. Simon Monk has a degree in Cybernetics and Computer Science and a PhD in Software Engineering. Dr. Monk spent several years as an academic before he returned to industry, co-founding the mobile software company Momote Ltd. He has been an active electronics hobbyist since his early teens and is a full time writer on hobby electronics and open source hardware. Dr. Monk is the author of numerous electronics books, including *Programming Arduino*, *Hacking Electronics*, and *Programming the Raspberry Pi*.

Users Review

From reader reviews:

Dorothy Marr:

This book untitled Practical Electronics for Inventors, Fourth Edition to be one of several books which best seller in this year, here is because when you read this reserve you can get a lot of benefit in it. You will easily to buy this kind of book in the book retail store or you can order it by means of online. The publisher in this book sells the e-book too. It makes you more readily to read this book, since you can read this book in your Smartphone. So there is no reason to you to past this book from your list.

Bettye Heinrich:

Reading a publication tends to be new life style in this particular era globalization. With reading through you can get a lot of information that may give you benefit in your life. Along with book everyone in this world can easily share their idea. Guides can also inspire a lot of people. A lot of author can inspire their reader with their story or their experience. Not only the storyline that share in the books. But also they write about advantage about something that you need example of this. How to get the good score toefl, or how to teach your kids, there are many kinds of book that you can get now. The authors in this world always try to improve their talent in writing, they also doing some study before they write on their book. One of them is this Practical Electronics for Inventors, Fourth Edition.

Patrick Stokes:

The reserve with title Practical Electronics for Inventors, Fourth Edition possesses a lot of information that you can understand it. You can get a lot of advantage after read this book. This particular book exist new information the information that exist in this book represented the condition of the world right now. That is

important to you to understand how the improvement of the world. This particular book will bring you throughout new era of the syndication. You can read the e-book on your own smart phone, so you can read this anywhere you want.

Jerry Sonnier:

Is it anyone who having spare time after that spend it whole day by simply watching television programs or just resting on the bed? Do you need something new? This Practical Electronics for Inventors, Fourth Edition can be the reply, oh how comes? It's a book you know. You are so out of date, spending your spare time by reading in this brand-new era is common not a geek activity. So what these guides have than the others?
