Welding and Metal Fabrication By Larry Jeffus

WELDING AND METAL FABRICATION employs a unique hands-on, project-based learning strategy to teach welding skills effectively and keep you motivated. This groundbreaking new book connects each welding technique to a useful and creative take-home project, making exercises both practical and personal--and avoiding the tedium of traditional, repetitive welding practices. To further enhance the learning process, every welding project includes a set of prints with specifications, like those used in production fabrication shops. This full-featured approach to skill-building reflects the reality of professional welding, where following prints and instructions precisely and laying out, cutting out, and assembling weldment accurately are just as essential as high-quality welding. The included projects are small to conserve materials during the learning process, but detailed instructions and abundant photos and illustrations guide you through a wide range of fabrication skills. Key steps and techniques within the small projects are also linked to larger projects presented at the end of each chapter, enabling you to apply what you have learned by fabricating and welding something more substantial. This thorough, reader-friendly book also prepares you for real-world success by covering shop math and measurement, time and material tracking, and invoicing.

Editorial Review

About the Author

Larry Jeffus is a welder with over 55 years of welding experience, and he has his own well-equipped welding shop. In his welding career he has passed many welding certification tests in a wide variety of processes, positions, and on many different material types and thicknesses. Larry has provided welding and professional consulting services locally, nationally, and internationally to major corporations, small businesses, government agencies, schools, colleges, and individuals. He is a Life Member of the American Welding Society. Larry Jeffus has over forty years experience as a dedicated classroom teacher and is the author of several Delmar Cengage Learning welding publications. Prior to retiring from teaching, Professor Jeffus taught at Eastfield College, part of the Dallas County Community College District. Since retiring from full-time teaching, he remains very active in the welding community, especially in the field of education. He serves on several welding program technical advisory committees and has visited high school, college, and technical campuses in more than forty states and four foreign countries. Professor Jeffus was selected as Outstanding Post-Secondary Technical Educator in the State of Texas by the Texas Technical Society. Professor Jeffus has served for 12 years as a board member on the Texas Workforce Investment Council in the Texas Governor's office where he works to develop a skilled workforce and bring economic development to the state. He served as a member of the Apprenticeship Project Leadership Team where he helped establish apprenticeship training programs for Texas, and he has made numerous trips to Washington lobbying for vocational and technical education. Larry Jeffus holds a Bachelor of Science Degree and has completed post graduate studies.

Users Review

From reader reviews:

Betty Casas:

Here thing why this specific Welding and Metal Fabrication are different and reputable to be yours. First of all examining a book is good but it really depends in the content of it which is the content is as scrumptious as food or not. Welding and Metal Fabrication giving you information deeper as different ways, you can find any reserve out there but there is no e-book that similar with Welding and Metal Fabrication. It gives you thrill studying journey, its open up your eyes about the thing that will happened in the world which is might be can be happened around you. It is easy to bring everywhere like in playground, café, or even in your approach home by train. In case you are having difficulties in bringing the published book maybe the form of Welding and Metal Fabrication in e-book can be your substitute.

Carlos White:

The experience that you get from Welding and Metal Fabrication will be the more deep you excavating the information that hide inside the words the more you get serious about reading it. It does not mean that this book is hard to know but Welding and Metal Fabrication giving you excitement feeling of reading. The author conveys their point in a number of way that can be understood through anyone who read the item because the author of this reserve is well-known enough. This particular book also makes your own personal vocabulary increase well. Making it easy to understand then can go along, both in printed or e-book style are available. We propose you for having that Welding and Metal Fabrication instantly.

Theodore Stewart:

Spent a free the perfect time to be fun activity to do! A lot of people spent their free time with their family, or all their friends. Usually they accomplishing activity like watching television, gonna beach, or picnic in the park. They actually doing ditto every week. Do you feel it? Do you want to something different to fill your personal free time/ holiday? May be reading a book could be option to fill your free time/ holiday. The first thing that you will ask may be what kinds of e-book that you should read. If you want to test look for book, may be the guide untitled Welding and Metal Fabrication can be very good book to read. May be it may be best activity to you.

Mary Craine:

This Welding and Metal Fabrication is new way for you who has interest to look for some information mainly because it relief your hunger info. Getting deeper you into it getting knowledge more you know otherwise you who still having little digest in reading this Welding and Metal Fabrication can be the light food for yourself because the information inside that book is easy to get by means of anyone. These books create itself in the form which is reachable by anyone, yeah I mean in the e-book form. People who think that in publication form make them feel drowsy even dizzy this book is the answer. So there isn't any in reading a guide especially this one. You can find what you are looking for. It should be here for anyone. So , don't miss the idea! Just read this e-book style for your better life and knowledge.
